Experience

2016 - 2025 **Freelancer** O'Reilly
Development of open source projects on GitHub (below), database encryption solutions for a security startup in Ireland and technical review of the book "Identity Security for Software Development".

2023 - 2024 **AI Developer** Precision Data
Development and maintenance of Natural Language Processing (NLP) AI applications for a remote startup company using Azure Functions, Container Apps, Supabase and LLMs with Python and FastAPI framework.

2015 - 2016 **Full-Stack Developer** Neolog
Development and maintenance of a desktop application for the logistics industry, working within a team of developers, testers and business analysts using agile methodology with Java, Spring Boot, JavaScript and AngularJS framework.

2014 - 2015 **Full-Stack Developer** Techne
Development and maintenance of the company's internal framework used by web systems in the education, healthcare and government sectors with SVN source control management, Java, Spring, JavaScript and ExtJS framework.

2012 - 2013 **Backend Developer** NIC.br
Development and maintenance of network systems for domain name registration (DNS) using Git for source control management with C++, Go and PostgreSQL.

2010 - 2012 **EMV & Telecom Developer** Giesecke+Devrient
Development of embedded systems for smartcards and desktop applications for data generation in the banking and telecommunications industries.

Projects

2024 - 2025 **AboutMe** GitHub
A C++ program designed to display detailed information about the user's hardware and software in a fast, easy, and safe manner.

2022 - 2025 **Sync** GitHub
A fast, portable, secure open-source tool written in Rust for creating backups, finding duplicate files and empty folders (3 sponsors).

Education

2010 - 2012 **Software Engineering Specialist** Instituto Tecnológico de Aeronáutica - ITA
Final paper: *Design Pattern with parallelism for real-time systems*. 36 pages. Instituto Tecnologico de Aeronautica. Sao Jose dos Campos (in portuguese).

2005 - 2009 **Bachelor of Computer Science** Universidade Estadual de Campinas - Unicamp
Volunteer work at Santa Casa de Jau: developed a desktop application that improved efficiency in the pediatric intensive care unit, resulting in better patient management.
